🧪 **CSS Lab Exercises**

Topics Covered:

- CSS Selectors
- CSS Properties
- Inline, Internal, External CSS
- CSS Box Model

🔹 **LAB 1 – Introduction to CSS Types**

🎯 **Objective:**

Understand **Inline, Internal, and External CSS**

📝 **Exercise 1A – Inline CSS (Basic)**

Task:

Create a simple webpage with:

- One <h1>
- Two <p>
- One <button>

Apply styles using **inline CSS**:

- Change heading color to blue
- First paragraph font-size: 18px
- Second paragraph background-color: lightgray
- Button background-color: green and text white

Expected Output:

Styled elements using style="" attribute.

📝 Exercise 1B – Internal CSS

Task:

Create an HTML file and inside <head> use <style>.

Apply:

- All paragraphs → font-family: Arial
- Body → background-color: #f4f4f4
- h1 → text-align center
- Button → padding: 10px

📝 Exercise 1C – External CSS

Task:

1. Create index.html
2. Create style.css
3. Link using:

<link rel="stylesheet" href="style.css">

Apply styles:

- Body background-color: lightyellow
- h2 color: darkred
- All divs border: 2px solid black
- Button hover effect → background black, color white

🔹 LAB 2 – CSS Selectors Practice

🎯 Objective:

Understand element, class, id, group, universal selectors

📝 Exercise 2A – Basic Selectors

HTML Structure:

Create:

- 1 <h1>
- 3 <p>
- 2
- 2 buttons

Tasks:

1. Use **Element selector** → style all <p> text color blue
2. Use **Class selector** → give one paragraph class highlight → background yellow
3. Use **ID selector** → style one div with id box → border red
4. Use **Group selector** → h1 and button → font-family: Verdana
5. Use **Universal selector** → remove default margin

📝 **Exercise 2B – Advanced Selectors (Intermediate)**

Create nested structure:

```
<div class="container">
  <p>Paragraph 1</p>
  <div>
    <p>Paragraph 2</p>
  </div>
</div>
```

Tasks:

- Use **Descendant selector** → make inner paragraph red
- Use **Child selector (>)** → first paragraph blue
- Use **Attribute selector** → style input[type="text"]
- Use **Pseudo class (:hover)** → button hover change color

🔹 **LAB 3 – CSS Properties Practice**

🎯 **Objective:**

Understand common CSS properties

📝 **Exercise 3A – Text & Font Properties**

Create a blog layout with:

- Title
- Subtitle
- Paragraph content

Apply:

- Title → font-size: 32px, text-transform: uppercase
- Subtitle → italic
- Paragraph → line-height: 1.6
- Add text-shadow to title

📝 **Exercise 3B – Background & Border Properties**

Create 3 cards using div.

Apply:

- Background color
- Border radius 10px
- Box shadow
- Padding 20px
- Margin 15px

🔹 **LAB 4 – CSS Box Model (Core Concept)**

🎯 **Objective:**

Understand content, padding, border, margin

📝 **Exercise 4A – Box Model Visualization**

Create a div:

CSS Box Model

Apply:

- width: 300px
- height: 150px
- padding: 20px
- border: 5px solid blue
- margin: 30px
- background-color: lightcoral

👉 Ask students:

- What is total width?
- What is total height?

📝 **Exercise 4B – Compare box-sizing**

Create two boxes:

Content Box

Border Box

Apply:

For box1:

box-sizing: content-box;

For box2:

box-sizing: border-box;

👉 Both width: 300px
👉 padding: 20px
👉 border: 5px solid

Observation:

Explain difference in total size.

🔹 **LAB 5 – Mini Project (Intermediate)**

🎯 **Create a Simple Product Card UI**

Requirements:

- Product Image
- Product Title
- Price
- Description
- Buy Now button

Must include:
✓ External CSS
✓ Class selectors
✓ Hover effect
✓ Box model
✓ Border radius
✓ Shadow

🔥 **Challenge Task**

Create a simple **Login Form** using:

- Form inside centered div
- Padding and margin
- Border radius
- Button hover effect

- Different background color for page
