CSS Property Sheet

1. Text & Font Properties (Very Important)

Property	**Example**	**Purpose**
color	color: red;	Text color
font-size	20px	Text size
font-family	Arial, sans-serif	Font type
font-weight	bold	Bold text
font-style	italic	Italic text
text-align	center	Align text
text-decoration	underline	Underline text
text-transform	uppercase	Change case

---

2. Background Properties

Property	**Example**
background-color	yellow
background-image	url("image.jpg")
background-repeat	no-repeat
background-position	center

3.Border Properties

Add border around the element.

Property	**Example**
border	1px solid black
border-width	2px
border-style	dashed
border-color	red
border-radius	10px

---

4. Padding Properties

Create space inside the element, between content and border.

Property	**Description**	**Example**
padding-top	**Space at top**	**padding-top: 10px;**
padding-right	**Space at right**	**padding-right: 20px;**
padding-bottom	**Space at bottom**	**padding-bottom: 15px;**
padding-left	**Space at left**	**padding-left: 5px;**

5. Margin Properties

Create space outside the element, between elements.

Property	**Explanation**
margin-top	**Space outside top**
margin-right	**Space outside right**

Property	Explanation
margin-bottom	Space outside bottom
margin-left	Space outside left
margin	Shorthand for all sides

6. Box Model (Most Important Concept)

Every HTML element is a box.

📦 **Box Model Structure:**

Margin → Border → Padding → Content

Property	Purpose
width	Element width
height	Element height
padding	Space inside
margin	Space outside
border	Border around element

Example:

```
.box {
  width: 300px;
  padding: 20px;
  border: 2px solid black;
  margin: 15px;
}
```

---

7. Display Property (Layout Basics)

Controls how an element behaves in layout.

Value	Meaning
block	Takes full width
inline	Takes required width
inline-block	Inline + width allowed
none	Hides element

Example:

```
div {
  display: inline-block;
}
```

8.Basic Positioning

Controls element placement.

Property	Values
position	Defines positioning method(static, relative)
top	Moves from top
left	Moves from left

9.Common Units

Define measurement system.

Unit	**Meaning**
px	Pixels- Fixed size
%	Percentage- Relative to parent
em	Relative size- Relative to parent text size
rem	Root size- Relative to root size
