📘 Introduction to Bootstrap 5

What is Bootstrap?

Bootstrap is a popular **front-end CSS framework** used to build responsive, mobile-first websites quickly and efficiently.

It provides:

- Prebuilt **CSS styles**
- Ready-to-use **UI components**
- Responsive **grid system**
- JavaScript-based interactive components

Bootstrap reduces the need to write CSS from scratch.

🆕 What is Bootstrap 5?

Bootstrap **Bootstrap 5** is the latest major version of Bootstrap.

Key Improvements in Bootstrap 5:

- ❌ Dropped jQuery dependency
- ✅ Improved grid system
- ✅ New utility classes
- ✅ Better customization with CSS variables
- ✅ Improved forms
- ✅ Offcanvas component added

📦 How to Use Bootstrap 5

There are 2 common ways:

Method 1: Using CDN (Recommended for Beginners)

Add this inside your <head> tag:

<link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.2/dist/css/bootstrap.min.css" rel="stylesheet">

Add JS before closing </body>:

<script src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.2/dist/js/bootstrap.bundle.min.js"></script>

Method 2: Download Bootstrap

1. Go to official website
2. Download compiled CSS & JS
3. Link files locally

🚀 Core Concepts of Bootstrap 5

---

1. Mobile-First Design

Bootstrap is **mobile-first**, meaning styles are written for small screens first and then scaled up.

Example:

- col-12 → Full width on mobile
- col-md-6 → Half width on medium screens
- col-lg-4 → 4 columns on large screens

2.Grid System (12-Column Layout)

Bootstrap uses a **12-column responsive grid system**.

Important Classes:

- container
- row

- col
- col-6
- col-md-4

3.Containers

Class	Description
container	Fixed width
container-fluid	Full width
container-sm/md/lg	Responsive container

4.Typography

Bootstrap automatically styles:

- Headings
- Paragraphs
- Lists
- Display classes

Example:

```
<h1 class="display-1">Large Heading</h1>

<p class="lead">This is lead text</p>
```

5.Buttons

```
<button class="btn btn-primary">Primary</button>

<button class="btn btn-success">Success</button>

<button class="btn btn-danger">Danger</button>
```

Available types:

- btn-primary
- btn-secondary
- btn-success
- btn-danger
- btn-warning
- btn-info

6.Forms

Bootstrap provides styled form components:

```
<div class="mb-3">
  <label class="form-label">Email</label>
  <input type="email" class="form-control">
</div>
```

7.Components

Bootstrap provides ready-made components:

- Navbar
- Card
- Modal
- Alert
- Accordion
- Carousel
- Offcanvas
- Toast

8.Utility Classes (Very Powerful)

Bootstrap 5 has many utility classes:

Spacing

m-3 (margin)

p-3 (padding)

mt-4 (margin-top)

Colors

text-primary

bg-dark

Flexbox

d-flex

justify-content-center

align-items-center

🎯 **Why Use Bootstrap?**

✓ Fast development
✓ Responsive by default
✓ Cross-browser compatible
✓ Large community
✓ Easy to learn
✓ Consistent UI

📚 **When Should You Use Bootstrap?**

Use Bootstrap when:

- You need fast UI development
- You are building admin dashboards
- You want responsive layout quickly

Avoid it if:

- You want fully custom UI design from scratch
- You need very lightweight CSS only

🏁 Summary

Bootstrap 5 is:

- A powerful front-end framework
- Mobile-first
- Component-based
- Utility-first friendly
- Easy to integrate
