**Hands-On Labs for Pre-HTML5 (HTML 4.01)**.

---

## 🧪 HTML (Pre-HTML5) – Hands-On Labs

---

### 🔬 Lab 1: Create Your First HTML Page

**Concepts Covered:** HTML structure, basic tags

**Objective**

Understand the basic structure of an HTML document.

**Tasks**

- Create an HTML file
- Add:
    - <!DOCTYPE>
    - <html>, <head>, <title>, <body>
- Display a heading and a paragraph

**Expected Output**

A simple webpage showing a heading and description text.

---

### 🔬 Lab 2: Working with Text Formatting

**Concepts Covered:** Text tags

**Objective**

Practice formatting text using HTML tags.

**Tasks**

- Use:
    - <h1> to <h6>
    - <p>, <br>, <hr>
    - <b>, <i>, <u>

    - <sub>, <sup>
- Create a formatted article page

**Expected Output**

A webpage with headings, styled text, and separators.

---

### 🔬 Lab 3: Hyperlinks and Navigation

**Concepts Covered:** Anchor tag, internal & external links

**Objective**

Create navigation using links.

**Tasks**

- Add links to:
    - External website
    - Another local HTML page
- Create bookmarks using id
- Add email link

**Expected Output**

A page with working navigation links.

---

### 🔬 Lab 4: Images and Media Basics

**Concepts Covered:** Image tag

**Objective**

Display and control images.

**Tasks**

- Add images using <img>
- Set:
    - width and height

    - alt text
- Make an image clickable

**Expected Output**

An image gallery page with clickable images.

---

### 🔬 Lab 5: Lists in HTML

**Concepts Covered:** Ordered, unordered, definition lists

**Objective**

Create structured lists.

**Tasks**

- Create:
    - Ordered list (steps)
    - Unordered list (features)
    - Definition list (terms & meanings)
- Nest one list inside another

**Expected Output**

A cleanly structured list page.

---

### 🔬 Lab 6: Tables for Data Representation

**Concepts Covered:** Tables, rowspan, colspan

**Objective**

Display tabular data.

**Tasks**

- Create a table with:
    - Header and data rows
    - Borders and spacing

- Apply:
    - rowspan
    - colspan
- Create timetable or marks table

**Expected Output**

A formatted table layout.

---
